

GMDN TERM DEVELOPMENT & RESULT CERTIFICATE

APPLICATION

Date of Application: 08/11/2013 12:58:58
Name of requestor: Mrs. Astrid Vogl
Company: Inotech Kunststofftechnik GmbH
Address: Boschstrasse 3, Nabburg, 92507, Germany
Country: Germany

Proposed Term: Reanimationsgeraet Herz

RESULTING TERM

GMDN Term: Cardiopulmonary resuscitation feedback device, manual
GMDN Code: 60841

Type of Term: P

Definition: A portable, manually-operated device intended to be applied to the chest of a patient experiencing cardiac arrest to assist a person trained in cardiopulmonary resuscitation (CPR) to deliver effective manual chest compressions. It typically consists of a chest plate with a large depressible button and is intended to translate an applied downward force into a well-positioned chest compression whilst indicating (e.g., with a click) when optimum force has been applied/removed; it may also assist the timing of chest compressions. This is a single-use device.
